

BASECAMP

OFFICE ENVIRONMENTS

ethosource OFFICE FURNITURE

BASECAMP office environments by Ethosource, combines a simple leg & beam design for easy installation and flexibility with a myriad of versatile components. This flexibility allows you to build, customize, and painlessly adjust your entire office - from benching and storage to private offices and conference rooms.

“Simple and beautiful,” the concept Basecamp was built on, has been said before but rarely fulfilled to this level. The frame, comprised of a set of bridge legs and adjustable-length beams (not to mention, a discreet trough for robust wire management), allows the table, desk, or workstation to be easily modified, whether you are expanding the workspace itself or building onto it. The legs align with the unique, floating top of your choice, creating an aesthetically pleasing, but functional system of components that can build any layout or arrangement.

Along with its internal, systematic flexibility, Basecamp can also be **customized with add-on accessories** including dividing screens, multiple power options, monitor arms, storage, and much more in order for you to create exactly what you need to personalize your office.

Combine all that with a competitive price and second-to-none customer service, and you get a benching system that can not only be contoured to every section of your office, but integrates seamlessly throughout to create **one cohesive space**.

BASECAMP Design

Basecamp was built on two primary pillars - **simplicity** and **design flexibility**. These two concepts working in harmony create the foundation for an aesthetically cohesive and functionally integrated office space. Basecamp's four main principles are specifically designed to support each of these pillars while maintaining balance between its internal components and external accessories.

Four Principles

Aesthetic

From the unique floating top surface to the beautiful metallic frame, Basecamp is designed with a minimalist touch that integrates into any modern office landscape.

Universal

Built with an inclusive simplicity, Basecamp was born with the ability to accept external pieces and accessories and seamlessly incorporate them into the overall environment.

Flexible

Because of its simple design and sleek aesthetic, Basecamp is just as applicable in your private office and conference room as it is in your open workspaces.

Functional

Basecamp's multiple power and data options, tidy wire management trough, and variety of storage options make it a beacon for productivity and organization.

BASECAMP Benching

In the quest to create an open and collaborative office environment, a premium benching solution becomes increasingly important. With Basecamp, we have combined simplicity and flexibility into a design that not only allows for complete customization in aesthetics but in layout as well. Build upon, take apart, and change your office easily and efficiently to create a personalized environment that brings down creative barriers and breeds collaboration among the entire company.

BASECAMP Desking

Along with its limitless benching applications, Basecamp can be contoured into a variety of desking options to accommodate even the highest-level executive's private office needs. Allowing flexibility within the boundaries of a private office, Basecamp desks can be designed to create a seamless transition between organizational levels and encourage unity among the workplace, while maintaining a level of privacy and harmony for those who require it.

BASECAMP Conference

Centered around integration and connectivity, Basecamp conference tables are beautifully designed to support any company meeting and build workplace rapport. Basecamp offers your choice of surface table top finish, multiple power grommet configurations, and wire management options to allow the maximum amount of customization while retaining office symmetry. Bringing people together around a central location to forge relationships and spark creativity is what Basecamp is all about.

BASECAMP Accessories

From upmount, tackable screens and low height storage to CPU holders and slinky cord managers, Basecamp can be equipped with everything you need to customize your office into a beacon of comfort and productivity.
